Sector Indicator Guidance

General Introduction

This **Sector Indicator Guidance for action design** has been developed by DEVCO Unit 04 “Results, Monitoring and Evaluation” jointly with DEVCO Thematic Units.

It is **addressed** to all colleagues involved in the preparation of action documents and project documents and offers a handy tool to develop solid logical framework matrices. It identifies clear and measurable results statements that are in line with DEVCO policy priorities, as well as with the UN Sustainable Development Goals (SDGs), along with a range of good indicators to monitor progress. It will be updated regularly to reflect evolving priorities.

Its **main objective** is to enhance the quality of DEVCO interventions – both in terms of design as well as of monitoring and reporting in the course of implementation.

The **need for this type of guidance** was identified in the framework of the results-reporting process led by DEVCO 04, as well as through its systematic review of all action documents presented to Quality Review Group meetings.

The present guidance covers DEVCO strategies in various sectors, and presents for each sector:

- 1. EU policy priorities:** a short narrative explaining EU policy priorities and commitments as articulated in key policy and strategic documents.

- 2. Results Chain:** a diagram showing the main results (impact, outcomes, outputs) that EU development interventions are expected to achieve in the sector, reflecting EU policy priorities and commitments.

- 3. List of Sector Indicators:** examples of measurable indicators associated to each result statement are provided, that may be used in Logframe Matrices at project/ programme level.

You can access the online Sector Indicator Guidance at indicators.developmentresults.eu using the username and password “Results”.

For further information and/or to provide feedback please contact DEVCO Unit 04 at feedback@developmentresults.eu

1. EU Policy Priorities

As outlined in the Global Strategy for the European Union’s Foreign and Security Policy,¹ the EU believes that there cannot be sustainable development without peace and security, and, vice versa, that without development and poverty eradication there will be no lasting peace. It is for this reason that the EU is committed to promoting development approaches alongside dedicated efforts to preventing and countering violent extremism (P/CVE) around the world. This nexus between development and security is also recognised and reflected in the UN’s Sustainable Development Goal (SDG) 16 on Peace, Justice and Strong Institutions.

In the last 15 years, there has been a gradual expansion of EU development and other cooperation policies into security-related areas such as preventing and countering violent extremism. This is likely to grow still further. Recent Operational Guidelines on the Preparation and Implementation of EU-financed Actions Specific to Countering-Terrorism and Violent Extremism in Third Countries² will ensure that EU’s development and security cooperation in these sensitive areas is cognisant of the risks of such an intervention, and can design appropriately targeted programmes that meet the objectives whilst mitigating risks in alignment with the EU’s fundamental principles of human rights, democracy and the rule of law.

Preventing and countering violent extremism can be understood to constitute all actions that strengthen the resilience of individuals and communities to the appeal of radicalisers and violent extremism, from interfaith dialogues to vocational training, mentorship programmes, training of state governance and security actors and community debates on sensitive topics.

The specific objectives are : “key state (governance and security), media and non-state actors at national and community levels prevent and address violent extremism”, and “individuals identified as at risk demonstrate more desirable attitudes and behaviors”. The overall objective of development cooperation in this field is “to reduce the incidents of violent extremism and support for such acts”.

The Key EU Principles on preventing and countering violent extremism

The EU programming in the area of preventing and countering violent extremism should follow a number of key principles in order to coherently design and implement high quality interventions:

- It must be evidence-based;
- The local context must be taken into account and programming tailored accordingly;
- A multidisciplinary and “Whole of Society” approach must be adopted, involving a range of actors beyond traditional law enforcement and military services, including health, education, good-governance and human-rights agencies , and civil society;
- A conflict-sensitive, “Do No Harm and Do Maximum Good” approach must be followed, aiming to ensure that project interventions do not cause human rights violations, exacerbate divisions between institutions and communities, and worsen existing grievances.

2. Results Chain

OUTPUTS

Specific objectives - OUTCOMES

Overall objective - IMPACT

National strategies and programmes on preventing and responding to violent extremism are developed
CVE capacities of key national and local authorities and CSOs are strengthened (particularly on issues relating to human rights, relevant legislation, messaging, VE factors, etc.)
CVE dialogue opportunities between key state and non-state actors are facilitated

Key state (governance and security), media and non-state actors at national and community levels prevent and address violent extremism

Strengthened media actors' capacities to prevent and address violent extremism
Vocational and life skills of vulnerable groups and at risk individuals are strengthened

Individuals identified as "at risk" demonstrate more desirable attitudes and behaviors

To reduce incidents of Violent Extremism and support for such acts in Location A

"At risk" individuals are provided with mentoring and religious guidance
Public awareness is raised about the risks of joining extremist groups

Related SDGs and Targets

Main impact
16. Peace, Justice and Strong Institutions
